One photo. Two identities.

A social-post concept for a manufacturer and the contractor it supports.

CONCEPT ONLY

Manufacturer logo

Your company logo

Good roof decisions start with the details.

Your website | Your office number

Illustrative photo. No project or partnership claim.

A workflow to discuss

1 Choose an approved photo

Use a permitted shared image or the contractor's own photo. Keep its actual context.

2 Keep both identities clear

Place approved manufacturer and contractor branding around the image.

3 Approve one final draft

Review the photo, wording and both brands once before export.

A concept to shape together

This illustrates an idea, not a currently available generator. One approved post would be exported; automatic social publishing is not part of this concept.

Plan a collaboration

Open the industry hub to discuss the audience, resource and brand permissions that fit your idea.
